DETAILED ACTION

Drawings

1. The drawings were received on 10/03/2003. These drawings are acceptable.

Claim Rejections - 35 USC § 112

2. Rejections made under 35 USC 112 are hereby withdrawn.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thomas et al (1,424,050), hereafter Thomas in view of Aurness et al (5,048,189), hereafter Aurness.

Thomas discloses guide member with a longitudinal guide channel 12; support arm 10, 11, 9, 8; arcuate portion juxtaposed between arms 10, 11; linear portion 9, 10, 11, 8; body piece 14, 13, 16, 18, 17; handle 14; cutting assembly 16, 15, 17, 18; workpiece 5; holder 17, 18; cutter wheels 15; upper portion on the left side of figure 4; lower portion on the right side on figure 4; medial portion 18; cutter wheels and cutting surfaces 15; cut line is in-line with wheels 15 in figure 1; unitary piece 17, 18; slider member 13; interior channel juxtaposed between 13 and 8; direction transverse to guide member is up and down in figure 1; as the body piece slides down

Art Unit: 3724

the arm 8, the distance between the cut in the paper is varied from the top edge of the workpiece 5; C-shaped cross section 12 in figure 2; when the clamps are set into channel in figure 2, no movement is allowed, however, it is inherent that in order to load the workpiece into the channel, the workpiece must be slid into the channel 12 is a substantially straight line; channel walls 12 in figure 2; selecting the cutting width is how far the user desires to slide the body piece into the workpiece; first side of guide member is above 12; second side of guide member is below 12;

Thomas does not disclose a securing bolt, and does not disclose a square cross section. Aurness teaches securing bolt 42 and square cross section juxtaposed 40 and 36. It would have been obvious to provide a securing bolt in Thomas as taught by Aurness in order to secure the body piece to the arm 8 while transporting the apparatus so that no damage is sustained to the cutting wheels. It would have been obvious to provide a square cross section in Thomas as taught by Aurness in order to indicia indicating the length of the cut being made in the workpiece. It is well know that indicia are printed on flat surfaces in order to be read clearly and quickly. Thomas also does not disclose a cube, however, Aurness teaches cube 18. It would have been obvious to provide cube 18 in Thomas as taught by Aurness in order to increase the structural integrity of the body piece.

Response to Arguments

5. Applicant's arguments with respect to claims 1-17 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Art Unit: 3724

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Seitz, Shaw, Warner, and Chubb are cited for general structure.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
